Premier Payroll Connections:

Reporting Payroll Just Got Easier for Policyholders Who Self-Report!

Premier Payroll Connections is designed to simplify the workers' compensation insurance payment process for policyholders who use certain payroll providers for their workers' compensation policy with Beacon Pay As You Go.

By adding Premier Payroll Connections for just $240 annually per FEIN of payroll, policyholders can automate their payroll reporting and enjoy real-time reporting of payroll information.

With Premier Payroll Connections, manual data entry is eliminated and the risk of errors is minimized. This means that policyholders can focus on running their business instead of worrying about their workers' compensation insurance payments.

To take advantage of this program, qualified policyholders simply need to contact their agent prior to their next renewal. Agents will coordinate with the Beacon underwriting team to initiate Premier Payroll Connections on their Pay As You Go program.
